Summary

Analytical Developer with >10 year track record of developing, testing and maintaining software programs. Adept at writing efficient and well-designed codes by using development practices. Knowledge of some programming language to work on daily job as needed. Experienced in consulting with stakeholders to gather requirements, define scopes and set project plans. Flexible hard worker ready to learn and contribute to team success.

Currently working for Lifepal Technologies (no 1 insurance marketplace in Indonesia) as Senior Software Engineer at the front-end side. My daily routine is working on 5 repositories (develop and maintain), from blog as content sources until the front-end of the company site to sell products (the marketplace itself). I accepted change request from SEO Team, Business and Marketing Team, Designer Team and definitely from Product Team as well. We use some technologies such as wordpress, next.JS, GraphQL, Pug for static site, and some supporting technologies (typescript, javascript, bootstrap, scss, tailwind, etc).

Skills

- Requirements analysis and design phases
- Application Development
- Front End : Node.js, Javascript, Vue.js, React, Redux, Typescript, Bootstrap, SCSS, Tailwind, Pug, Laravel, PHP
- Google Tag Manager and Google Analytic
- Customer-oriented
- Agile Development methodologies
- Self-started
- Experience with version repository (Github, Gitlab, Jetbrains)

Work Experience

Senior Software Enginer/Front-End (August 2021 > Present)

- Together with SEO team, working on maintaining our site always number 1 on SERP.
- With Business and Marketing Team, we support them with some promo pages for campaigns, delivered to customers, capture user action (GTM, GA, and other third parties) and maintain the traffic site.
- With the Designer Team, we are communicating to ensure the design implemented accordingly.
- And with product team, we have to follow dynamically and rapidly product changes from them.

Freelance Programmer/Developer Consultant (Feb 2018 > August 2021)

- Developed some websites using some different programming languages.
- Built custom SOAP APIs to suit unique customer needs. (javaEE, node.js)
- Leveraged REST services and other third-party APIs to shorten development times and expand product capabilities.
- Built layouts according to customer parameters using HTML5 and CSS3.
- Contributed back-end development experience and collaborated on multiple APIs crucial to functionality.
- Participated in pre-project analysis and technical assessments to develop user-friendly interface and correct functionality to meet business objectives.
- Coordinated specifications and requirements for project technical needs.
- Built and applied reusable code to other projects to reduce consulting fees and development hours.
- Developed, coded, installed, tested, debugged and documented web applications using appropriate editors.
- Projects :
  - Startup Garuda Ticketing (Flylist/2018) : front end using React and Redux
  - Startup Marketplace Booking Ticket (Sabre International/2018) : front end using React and Redux
  - In-House Application for Investment (Pacific Capital Investment/2019) : front end using PHP Laravel + Eloquent
  - Clinical Laboratoy Information System (Healtri Teknologi/2019) : front end using Vue.js and backend using JavaEE
  - Drug Interaction Applicaiton (UIN Syarif Hidayatullah/2019): front end using PHP Laravel + Eloquent
  - General Affair Apps (MRT Jakarta /2020) : front end using Vue.js and backend using Node.JS
  - Survey ATG Pertamina (Surveyor Indonesia/2021) : front end using Vue.js

Operation Manager – PT. Indoris Cipta (Oct 2015 - Feb 2018)

- Directed day-to-day operations by spearheading implementation of short-term and long-term strategies to achieve business plan and profitability goals.
- Conducted performance reviews providing coaching and feedback to benefit both company and employee.
- Delivered positive customer experiences by implementing effective quality assurance practices.
- Collaborated with staff to maximize customer satisfaction, streamline procedures and improve bottom-line profitability.
- Recruited, hired and trained crew members on application of projects, customer relations and customer service.

Technical Leader – PT. Teknoglobal Multi Sistem (Sep 2011 - Aug 2015)

- Performed peer reviews of technical projects, providing feedback to production staff and senior personnel.
- Guided personnel on overall project direction and alignment with prescribed business goals.
- Collaborated with engineers to produce timelines, production roadmaps and scenario plans.
- Kept resources current, organized and maintained in optimal condition.
- Directed 2-5 person team of personnel specializing in executing planned technical updates.
- Projects :
  - ➢ GRP SOA Oracle Implementation in BIG (Geospacial Information Agency)
  - ➢ HSE, Budgeting, Contract Profit Sharing Application in Pertamina EP (Oil and Gas) using PHP and Microsoft SharePoint.
  - ➢ FRESH production planning in Carefour Indonesia (ZK Framework).
